

# PROJECT SUMMARY

## M6 Stage 1

CLIENT : TfNSW

PROJECT VALUE : \$3.1bn

ENGAGEMENT PERIOD : JUL 2024 - PRESENT

### PROJECT OVERVIEW

The M6 Stage 1 project involves the construction of twin tunnels linking the M5 Motorway at Arncliffe to President Avenue at Kogarah.

In 2024, a subsidence event resulted in tunnelling works being paused around West Botany Street in Rockdale. Further ground improvement works to the area necessitated additional utilities works to be completed.

### Involvement

Croí personnel were engaged to manage critical utilities scope and risk required for ground improvement works after 2024 ground subsidence event. Key involvements:

- Specialist advice on utilities scopes of work
- Subject matter expert input to commercial claims
- Utilities authority stakeholder management (Jemena, Sydney Water, Ausgrid)

### Key Interfaces

- Ausgrid
- Sydney Water
- Jemena

### Key Achievements

- Delivery of Jemena high pressure gas main relocation ahead of schedule
- Oversee the delivery of critical utilities relocations required to enable ground improvement works at West Botany Street

### Key Benefits

- Delivery of Jemena high pressure gas main relocation ahead of schedule
