PROJECT SUMMARY

WestConnex M8 Munni Street

CLIENT: TFNSW | **PROJECT VALUE: $2 MIL** | **ENGAGEMENT PERIOD: 2025-2026**

PROJECT OVERVIEW

Stormwater channel modifications at Euston Road, Alexandria, under the WestConnex M8 programme, to Sydney Water's approved design. Croí supported procurement and contract development across commercial, technical and asset-owner interfaces.

Utilities & Project Management

Croí's Role

Croí personnel were involved in:

- provided procurement and interface coordination.
- GC21 contract departures and negotiations
- Commercial and legal review coordination
- Site access and risk allocation advice
- Execution documentation and approval support

Key Achievements

- Progressed GC21 procurement through coordinated contract departures, negotiations and execution documentation.
- Clarified site-access obligations and site-condition risk allocation to support informed commercial decisions.
- Coordinated review of extension-of-time, delay-cost and variation provisions to strengthen contractual clarity.
- Aligned client, Sydney Water, legal and technical stakeholders to resolve procurement and interface issues.

Key Interfaces

- Transport for NSW
- Sydney Water
- Civil contractor and consultants
- Commercial and legal teams
- Property and technical specialists

Key Outcomes

- Clearer contractual responsibilities and risk allocation
- Better-informed procurement decisions
- Coordinated asset-owner and property interfaces
